

## **BUG REPORT**

**BUG ID:** 01

**Title:** OTP input box is not interactive

**Bug Description:**

When the user clears the app storage and cache, the OTP input box does not respond when tapped.

**Module:** Login

**Environment:** Android 16 device

**Steps to Reproduce:**

1. Go to App Info
2. Clear app storage and cache
3. Open the app
4. Swipe to proceed
5. Enter mobile number
6. Tap on the **Enter OTP** input box

**Expected Result:**

The cursor should appear in the OTP input box and the keyboard should open.

**Actual Result:**

Nothing happens when the OTP input box is tapped.

**Severity:** Medium

**BUG ID:** 02

**Title:** App stuck on loading screen when location permission is denied

**Bug Description:**

When the user opens the app and does not allow location permission, the app gets stuck on the loading screen.

**Module:** Home

**Environment:** Android 16 device

**Steps to Reproduce:**

1. Open the app
2. When the location permission popup appears, tap **Don't Allow**
3. Observe the app behavior

**Expected Result:**

The app should continue to load normally even if the location permission is denied.

**Actual Result:**

The app remains stuck on the loading screen and does not proceed.

**BUG ID:** 03

**Title:** App shows “No cars found” on main screen

**Bug Description:**

When the user opens the app and allows location permission, the main screen shows “**No cars found**” in the recently listed section.

**Module:** Home Page

**Environment:** Android 16 device

**Steps to Reproduce:**

1. Open the app
2. Allow location permission
3. Check the “Recently Listed” section on the main screen

**Expected Result:**

The app should show cars in the recently listed section.

**Actual Result:**

The app shows “No cars found” in the recently listed section.

**Severity:** High

**Priority:** High

No Cars Found

**BUG ID:** 05

**Title:** “No cars found” shown in **Hatchback** category

**Bug Description:**

When the app opens, the **Hatchback** car category is already selected, but it shows “**No cars found**” even though cars should be available.

**Module:** Home Page

**Environment:** Android 16 device

**Steps to Reproduce:**

1. Open the app
2. Check the **Hatchback** car category

**Expected Result:**

The app should display available **Hatchback** cars.

**Actual Result:**

The app shows “**No cars found**” in the Hatchback category.

**BUG ID:** 07

**Title:** Cars are shown only after double tap on car category

**Bug Description:**

When the user taps once on any car category, the app shows “**No cars found**”, but when the user taps **twice**, vehicle details are displayed.

**Module:** Home Page

**Environment:** Android 16 device

**Steps to Reproduce:**

1. Open the app
2. Tap once on any car category
3. Tap again on the same category

**Expected Result:**

The app should display available cars on **single tap**.

**Actual Result:**

The app shows “**No cars found**” on single tap and displays cars only after **double tap**.
