Software Testing Task Assignment

Task Title: Application Bug Identification & Report Submission

Objective

The objective of this task is to evaluate the tester's ability to explore an application, identify bugs/issues, and document them clearly in a structured bug report.

Task Description

You are required to:

- Download and install the assigned application.
- You can find the application link and QR at the end of the document.
- Explore the application thoroughly.
- Select **any 2 or 3 screens** within the application.
- Identify **bugs or issue per selected screen** (UI, functional, performance, or usability issues).
- Prepare a **small bug report** based on your findings.

Scope of Testing

You may report issues related to:

- UI/UX (alignment, spacing, text overlap, responsiveness, etc.)
- Functional behavior (buttons not working, incorrect navigation, etc.)
- Performance (slow loading, screen freeze, crashes, etc.)
- Usability (confusing flow, unclear labels, etc.)

Bug Report Format

There isn't any specific format but the report should include

- Screen Name (Which screen the bug is in)
- Bug Title
- Bug Description
- Steps to Reproduce
- Expected Result- Actual Result
- Severity: (Low / Medium / High)
- Screenshot: (Attach if possible)

Submission Guidelines

Compile all bugs into **one document,** file format: **Word (.docx) or PDF or Excel.** Ensure the report is clear, concise, and well-structured.

Evaluation Criteria

- Ability to identify relevant issues
- Clarity of bug description
- Attention to detail
